Schedule of Main Modifications for the Merseyside and Halton Waste Local Plan

1. Introduction.

1.1 This section of the document sets out a schedule of main modifications proposed to the Joint Merseyside and Halton Waste Local Plan (WLP) since the publication of the Proposed Submission Document (formerly the Waste DPD) (November 2011). Changes are shown as follows:

- Blue underline to show text to be inserted
- Red strike through to show text to be deleted

1.2 Both the main and additional modifications were open for re-consultation as part of the Examination in Public Hearing process which was conducted by the Planning Inspector, Elizabeth Ord, who was appointed on behalf of the Secretary of State to undertake the examination into the soundness of the Joint Merseyside and Halton Waste DPD. The Inspector only considered the main modifications to the plan and not the more minor, additional modifications.

1.3 The need to make these Main Modifications arose as a result of the Examination in Public including discussions with representors and production of Statements of Common Ground. [Changes arising from the representations made in response to the consultation on the Proposed Submission Document are shown in the Reason for Change column of the tables as follows: In response to representation received (Name- Unique ID PS_XX)]

1.4 The main modifications included in this schedule were discussed extensively during the Hearing sessions with the Inspector, representors and the Waste DPD Steering Group, and were requested because they will either improve the soundness or deliverability of the Plan. However, in most cases the finer details of the modified policies were not discussed.

1.5 The body of this section is set out to follow the order of the Waste DPD Proposed Submission document, with the changes proposed shown for each section of the document, from the Table of Policies through to the Site Profiles at Appendix 2. The main modifications are identified as MM-XXX.

Schedule of Additional Modifications

1. Introduction.

1.1 This section of the document sets out a schedule of additional modifications proposed to the Joint Merseyside and Halton Waste Local Plan (WLP) since the publication of the Proposed Submission Document (formerly the Waste DPD) (November 2011). Changes are shown as follows:

- Blue underline to show text to be inserted
- Red strike through to show text to be deleted

1.2 Both the main and additional modifications were open for re-consultation as part of the Examination in Public Hearing process which was under consideration by the Planning Inspector, Elizabeth Ord, who was appointed on behalf of the Secretary of State to undertake the examination into the soundness of the Joint Merseyside and Halton Waste DPD. The Inspector only considered the main modifications to the plan and not these more minor, additional modifications.

1.3 The need to make changes arose for four main reasons:

- Editorial amendments (grammar and typographical) to improve the reading of the document.
- Factual updates since the Proposed Submission Document was published in November 2011, and since the Examination Hearings to make the Waste DPD as up-to-date as possible or correct factual inaccuracies where they have mistakenly occurred.
- Changes arising from representations made during the consultation periods in November 2011 to January 2012 and then in November 2012 to January 2013, and subsequent discussions with representors including preparation of Statements of Common Ground, where the Waste DPD Steering Group agreed that the change proposed would improve the Joint Merseyside and Halton Waste DPD. [Changes arising from the representations made in response to the consultation on the Proposed Submission

WASTE Planning Merseyside

Your Waste, Your Opportunity, For Our Future

Document are shown in the Reason for Change column of the tables as follows: In response to representation received (Name-Unique ID PS_XX)].

- Modifications resulting from changes to national legislation, policy and planning guidance which has been issued since the Waste Local Plan was submitted to the Secretary of State, and the Examination in Public Hearing.

1.4 The body of this report is set out to follow the order of the Waste DPD Proposed Submission document, with the changes proposed shown for each section of the document, from the Table of Policies through to the Site Profiles at Appendix 2. The additional modifications as AM-XXX.

1.5 For the additional modifications in section 5 Development Management Policies, additional paragraphs early on in the section push the numbering sequence of paragraphs on by 4 paragraphs. Consequently, where later paragraphs in the section have been amended they have been referred to as previous paragraph 5.X to reflect the paragraph number in the Proposed Submission Version of the Waste Local Plan. This should assist with cross referencing.

1.6 For changes to supporting documents, such as the full site profiles document, Sustainability Appraisal and Habitats Regulations Assessment Reports, please see separate tracked changed documents or supporting statements available at <http://merseysideeas-consult.limehouse.co.uk/portal> .

		may need to be considered in the development of any site for a waste use. They should be used to help scope the information, surveys and technical assessments that may be necessary to support a planning application and satisfy the requirements of Policy WM12 and Box 1. Metadata for the criteria in table 5.1 is provided in "Appendix J:GIS Data Sources" of the supporting document – Build Facilities Site Search Methodology. In addition, guidance on the criteria is provided at www.wasteplanningmerseyside.gov.uk.		
AM-070	Section 5 Previous para. 5.59	Amend the text as follows: Since the Preferred Options Consultation, MRWDA has also narrowed its Resource Recovery Contract (RRC) procurement process down to the final two bidders, both of whom are proposing to use consented facilities outside the sub region. The procurement process should be finalised by the end of 2012. However, the outcome of the RRC procurement is not known, whilst there is a high probability of a successful outcome, this is not certain. It is therefore considered necessary to provide a policy for Energy from Waste that will enable meeting the identified waste management capacity supply and demand needs for waste arising within the	Since the Preferred Options Consultation, MWDA has also narrowed its Resource Recovery Contract (RRC) procurement process down to the final two bidders, both of whom are proposing to use consented facilities outside the sub-region. Therefore, the requirement to allocate sites for EfW specifically for LACW is removed. Policy WM14 ON Energy from Waste Provision is shown below.	Provides clarity and reflects modification to policy WM14 In response to representations received from (MWDA-PS_61) and (CWAC-PS_71)
